

# Community engagement summary report

*This report provides a summary of the feedback received during the community consultative committee meetings for the period Feb–June 2020*

Eltham area Community Hospital  
Community Consultative Committee meeting  
Meeting details

Virtual meeting via Microsoft Teams  
Wednesday 10 June 2020

## Engagement purpose

Community consultative committees provide a forum for members of the local community to participate in the planning and development of the community hospitals project through open dialogue and consultation.

The meetings provide a mechanism through which views of the community are heard, emerging issues are monitored, and concerns and priorities of the community are voiced.

## Session summary

The meeting updated the group on the progress of the Eltham area Community Hospital and consulted them on the development of the community hospitals overarching service model principles. The project team presented an overview of the Victorian hospital system and the local health context, reported back on engagement and communications activities to date, shared results from the October 2019 Engage Victoria survey and November 2019 service model design workshops, and responded to questions and concerns about the project,

More importantly, the meeting provided a forum to test the community hospitals overarching service model principles. This was done through a workshop activity where committee members rotated in smaller groups to discuss and explore the three service model design principles:

Effective service relationships

Patient-focused services

Community engagement

## Who was there

**Chair:** Vicki Ward MP

**Foundation members:** Representatives from Austin Health, Nillumbik Shire Council, Carrington Health, and Banyule Community Health

**Community members:** 10 community members from Eltham area

**Staff:** Community Hospitals Project Director, VHHSBA Planning, DHHS System Design, VHHSBA Communications and Engagement

## What we heard

"No duplication of patient information don't make us tell our story twice to each service we are referred to"

"Tap into GP's and local services that have good trusted connections within our community"

"Front of house staff who have a good cultural understanding to make sure people feel welcome and understood from the start of their experience"

"We need to have seamless sharing in patient information across different services"

"Health services need to acknowledge patients' understandings of their bodies and minds... Patients need to feel listened to and heard"

## Issues and sentiment

Many questions over **funding and land options**, in consideration of where this Community Hospital will be located.

Interest in hearing from health services that have an **effective community development model** in place rather than a medical model.

Emphasis on a need for staff should have cultural awareness training and be **sensitive to the needs of many cultural groups**.

## Insights, themes and opportunities

Principle	Main themes	Opportunities identified
<p><b>Effective service relationships</b></p> <p>Develop and maintain partnerships between service providers that build on existing relationships and promote the integration and coordination of patient care.</p>	<p>Shared governance.</p> <p>Information sharing processes and systems.</p> <p>Work with existing local partnerships and family services.</p>	<p>Link with social enterprises and outlets.</p> <p>Seek local procurement opportunities.</p> <p>Relationships with Ambulance Victoria, NDIS, GPs, dentists, Orange Door.</p> <p>Partner with community organisations, childcare, playgroups, libraries, schools, and vocational training.</p>
<p><b>Patient-focused services</b></p> <p>Use innovative service models and delivery methods that respond to the needs of local communities and promote the integration and coordination of care.</p>	<p>Single point of entry and no wrong door, facilitate navigation of services.</p> <p>Culturally safe and specific care.</p> <p>Flexible after-hours services.</p>	<p>Have the community hospital be a one-stop-shop and promote seamless service between providers.</p> <p>Set realistic patient expectations, making sure the patient understands the service journey.</p> <p>Multi-cultural and multi-lingual support services, to promote cultural safety and awareness.</p>
<p><b>Community engagement</b></p> <p>Engage and empower communities to design services that respond to the local health needs and demand for services over time.</p>	<p>Community education.</p> <p>Continuously provide opportunities for feedback.</p> <p>Reflect community diversity.</p> <p>Vocational training opportunities for local students.</p> <p>Multidisciplinary spaces.</p>	<p>Tap into local networks, and foster awareness about what a community hospital is through local stalls and pop ups at festivals.</p> <p>Joint community database with local government and social and sporting clubs.</p> <p>Promote mental and physical wellness, for example links to aged care services.</p> <p>Build awareness via new and old media.</p>
